RHODODENDRONS

Ever since the importation of Rhododendrons from Europe was stopped Koster Company has been propagating these beautiful plants in large quantities. During the past twenty years, we have grafted almost half a million hybrids. Koster Rhododendrons are known throughout the United States for their superior quality. Our plants are all grafted on hardy understocks by expert propagators and must not be compared with inferior hybrid seedling Rhododendrons. They are especially hardy, being produced under open field culture, and have compact tops and splendid root systems.

We are America's largest hybrid Rhododendron growers and offer an unusual selection of many varieties. When you think of Rhododendrons, think of Koster.
